### SECTION 5. FIRE FIGHTING MEASURES

with a full face-piece operated in positive pressure mode.

4. Special protective equipment for fire-fighters :  
 Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.  
 No action shall be taken involving any personal risk or without suitable training.  
 Move containers from fire area if this can be done without risk.  
 Use water spray to keep fire-exposed containers cool.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

1. For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training.  
 Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering.  
 Do not touch or walk through spilled material. Shut off all ignition sources.  
 No flares, smoking or flames in hazard area. Do not breathe vapor or mist.  
 Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate.  
 Put on appropriate personal protective equipment.
  2. For emergency responders : If specialised clothing is required to deal with the spillage,  
 take note of any information in Section 8 on suitable and unsuitable materials.  
 See also the information in "For nonemergency personnel".
  3. Environmental precautions :  
 Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.  
 Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air)  
 sent to incineration.
  4. Methods and material for containment and cleaning up
    - A. Small spill : Stop leak if without risk. Move containers from spill area.  
 Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.  
 Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate  
 waste disposal container. Dispose of via a licensed waste disposal contractor.
    - B. Large spill : Stop leak if without risk. Move containers from spill area.  
 Use spark-proof tools and explosion-proof equipment. Approach the release from upwind.  
 Prevent entry into sewers, water courses, basements or confined areas.  
 Wash spillages into an effluent treatment plant or proceed as follows.  
 Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or  
 diatomaceous earth and place in container for disposal according to local regulations (see Section 13).  
 Dispose of via a licensed waste disposal contractor.  
 Contaminated absorbent material may pose the same hazard as the spilt product.
- \* Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### SECTION 7. HANDLING AND STORAGE

1. Precautions for safe handling
  - Protective measures : Put on appropriate personal protective equipment (see Section 8).  
 Persons with a history of skin sensitization problems should not be employed in any process in which  
 this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist.  
 Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate.  
 Do not enter storage areas and confined spaces unless adequately ventilated.  
 Keep in the original container or an approved alternative made from a compatible material, kept tightly closed  
 when not in use. Store and use away from heat, sparks, open flame or any other ignition source.  
 Use explosion-proof electrical (ventilating, lighting and material handling) equipment.  
 Use only non-sparking tools. Take precautionary measures against electrostatic discharges.  
 Empty containers retain product residue and can be hazardous. Do not reuse container.
2. Conditions for safe storage, including any incompatibilities :  
 Store in accordance with local regulations. Store in a segregated and approved area.  
 Store in original container protected from direct sunlight in a dry, cool and well-ventilated area,  
 away from incompatible materials (see Section 10) and food and drink. Store locked up.  
 Eliminate all ignition sources. Separate from oxidizing materials.  
 Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully  
 resealed and kept upright to prevent leakage. Do not store in unlabeled containers.  
 Use appropriate containment to avoid environmental contamination.
